Gerperations Bedge Taxes.

It is a well known fact that more than one hundred million follars worth of privately owned coal lands and coal mining plants escape all taxalion in this state. Moreover, the Phelps-Bodge people are not the only big corporation that dodge their taxes; there are some half a dozen others equally delinquent.

The attorneys of several big corporations in New Mexico form computations with the machine politicians and in that way manage to keep the state backward. For instance, few people realize that these interests put over on New Mexico one of the most renetlemany constitutions to be found among all the states. est reactionary constitutions to be and among all the states. Bernard S. Rodey. former territorial delegate from New ico to congress, today expressed salisfaction that The El Paso aid is devoting so much attention his time to political matters in his a, and incidentally divested him of a few political sentiments of own.

The declaration of Ralph C Ely, state Republican chairman, in The Herald, was the occasion for judge Roder's remarks. It am slad that you me string publicity to such state ments of conditions in our state," he strength end of conditions in our state," he strength end of conditions in our state," he strength end of conditions in this state, and and help and the see you come it was and the facts. ments, with interest on the deferred payments only I per cent, when money is worth eight per cent, so that figuring the low interest, the land is being sold for about \$1.50 per acre. It would have been much better to have kept this land and rented it at a few cents per acre to stockmen, and then at the end of the 30 years, our schools would still own the land, and would have enjoyed an income in the meantime. It is being sold now, and has been for several years in hundreds of thousands of acres, and is going into the hands of monopolists and mere speculators.

Cursed By Spanish Grants. Cursed By Spanish Grants.

We were cursed with the Spanish land grants surway, and with the criminal waste of the public domain in the checkerboard grants to the transcontinental railroads. Then came tupon us the millions of acres of forest reserve scrip lifted bodily from Arizona and foisted on New Mexica mostly in the Pecos valler, and now comes this unlimited sale law of 1912 so that the state is being exploited, and its next generation will be a land of mere tenants. There are fracts of land in New Mexico now, as big as a New England state, in private awinership, that you cannot even cross without a pass from some coal mine manager.

well headquarters for the state of New Mexico. "The movement in favor of Col. Roosevelt's candidacy is now well organized and the sentiment for him is growing stronger every day," he centimed. "He will carry our county of Sierra, he will carry the state of New Mexico by a good, nafe majority, and I believe he will be elected the next president of the United States.

"Telegrams that we are receiving daily from the national headquarters are of a most favorable and optimistic tone. What we are organizing and just beginning to do here has already been done, and done effectively, elsewhere. We are sending out a great many letters to people who are the friends of the delegates.

"We are not afraid of the delegation as it stands now, but we want to make sure of it. If that can possibly he done, When a delegate has no great interest of his own, he is likely to become interested in the candidate who is favored by his friends and constituents. The members of the committee are sending telegrams and letters, and the friends of the members of the committee are sending telegrams and letters, so the circle of influence keeps widening.

"As I have said, Col. Roosevelt will be nominated on the second ballot. The first ballot will be cast for the favorite sons of the several states and districts, and, in my judgment, will be complimentary. The second ballot will make the colonel the houlines of the Pepublican party for president of the United States.

"Catron alone of the New Mexico delegation is against Roosevelt. Fall, Hernander and Cunningham are for him in the event that he is available, and it is certain that he will be available. Catron is not for him, and probably never will be.

"Catron alone of the New Mexico is composed of active men who will do all in their power to advance the cause. They are: Mar. W. H. H. Liew-ellyn, of Las Cruces; W. A. Fleming Jones, of Las Cruces; W. A.

detective or official who will call for your passports, and if you resent his action he will order you of and tell you that all that country is private propesty. Of course, the idea is that you might be an agitutor orf a labor union walking delegate or something of that kind. Actually you would think you were in Bussia instead of under the Star and Stripes.

Catt'emen Control Whole Counties.

Whole counties in the state are fast going into the hands of a few eattlemen, and the end is not yet. New Mexico has an area as large as all of the New England states, put to gether, with New York and New Jerson the New England states, put or gether, with New York and New Jerson thrown in, and of this vaset area counting Spanish land Stants, railroad grants, forest reserve scrip locations, and these siles of state lands, about two-thirds of it is alrendy gone into private ownership in tracts eo wast as to make the state look like a set of European principalities instead of a state of the union of the United States. The state has an area of 75,800,000 acres in gone, and gone forever from the poople.

Attorneys and Losbysist Rule.

"It it any wonder that Mr. Ely and myself and many others are lifting our voices in an endeavor to correct things before it is entirely too into These is bound to be and there ought to be an uprising of the people of New Mexico to take their own government into their own hands, and relevant for any attorney who will lobby in a legislative assembly to enable his ellent to unfairly dodge his just laves is disreputable, and if the har associations did their duty he would be dishbarred.

E. S. Constitution Set Aside.

"Another point I did not mention is: The 17th ameniment to the constitution of the United States is a dead letter in New Mexico, for lark of a primary law. It provides for the election of U. S. senators by the people instead of by the legislatures, but in New Mexico unless a person secures the meb nomination from a mob' convention of hand picked agents of the bosses, he cannot even be a candidate. The voter in New Mexics must vote for the hand picked candidate of one or the other of the old perties (which means the boss named candidate) or not vote at all, and there you are. We need help to straighten out things in this state. Our people are all right, but their means of propagands and publicity is limited and the interest take criminal advantage of conditions." E. S. ## How You May Throw Away Your Glasses

The statement is made that thousands wear eyegiasses who do not really need them. If you are one of hese unfortunates, then these glasses may be ruining your eyes instead of helping them. Thousands who wear these "windows" may prove for themselves that they can dispense with glasses if they will get the following prescription filled at once: Go to Ecily & Pollards drugstore and get a bottle of Optona; fill a two-ounce bottle with warm water and drop in one Optona tablet. With this harmless liquid solution bathe the eyes two to four times daily, and you are likely to be asionished at the results right from the start. Many who have been told that they have astigmatism, eyesterain, cutaract, sore eyelide, weak eyes, conjunctivitis and other eye disorders, report wonderful benefits from the use of this prescription. Get this prescription filled and use it; you may so strengthen your eyes that sinsses will not be necempary. Thousands who are blind, or nearly so, or who wear glasses might never have required them if they had cared for their eyes in time. Save your eyes before it is too inter Do not become one of these victims of neglect. Eyeglasses are only like rintches and every few years they must be changed to fit the ever-inervasing weakened condition, so better see if you can, like many others, get clear, healthy, strong magnetic eyes through the prescription in the prescription of interest on building jobs which has been in progress hers a weak, was set-lied Sunday night by the employers liked sunday night by the employers.
